Education

Dalhousie University **September 2023 – August 2027**
Bachelor of Science (BSc) in Computer Science (Co-op) *Halifax, Canada*
Certifications: AWS Certified Cloud Practitioner (CLF-C02), ISC2 Certified in Cybersecurity (CC)

Professional Experience

Software Developer Intern **January 2026 – May 2026**
Nautel *Halifax, Canada*

- Built and enhanced automated testing infrastructure, reducing QA workload and increasing test coverage by **25%**.
- Developed and maintained **150+** end-to-end tests using **Playwright, Cucumber and TypeScript** enabling earlier detection of regressions in the development cycle.
- Designed and standardized **200+ unique Test IDs** across application pages with clear documentation to streamline test creation and minimize ambiguity between QA and developers.
- Refactored brittle **UI locators** with **AUI-based Test IDs**, significantly improving test stability and reducing flaky failures.

IT Support Analyst **September 2026 – December 2026**
Dalhousie University *Halifax, Canada*

- Manage **Active Directory** user accounts, permissions, and security group memberships, and resolve **CSID** (Dalhousie campus login) authentication and access issues.
- Contribute to **MFA deployment** and troubleshoot user enrolment and authentication issues to support secure account access.
- Document issues and resolutions in the **internal ticketing system** and coordinate follow-ups through **Microsoft Teams**.

Web Developer Intern **May 2025 – August 2025**
Faysal Bank *Lahore, Pakistan*

- Developed and deployed internal web tools using **React.js, JavaScript, and REST APIs**, automating manual processes and saving **10+ hours of work per week**.
- Collaborated with IT and business stakeholders to gather requirements, analyze user needs, and deliver user-friendly internal web solutions.
- Optimized existing code base by refactoring JavaScript logic and applying caching strategies, reducing page load times by **20%** and improving system reliability.

Projects

PredictHealth (ML Diabetes Predictor) | *Python, NumPy, Pandas, Streamlit, OpenAI* **September 2025**

- Built an **AI-powered** diabetes prediction app combining a Random Forest Classifier with a **Streamlit** interface.
- Achieved **72%** accuracy by applying preprocessing and standard scaling on a real-world dataset.

RouteWise – Flight Intelligence Platform | *React, Vite, FastAPI, Python, JavaScript* **July 2026**

- Developed a full-stack flight intelligence platform with a **React frontend** and **FastAPI backend**, enabling users to search, filter, sort, and compare simulated domestic and international flights.
- Implemented advanced features including **airport autocomplete, favorites, recent searches, flight comparison, best-value recommendations, and responsive UI**, using reusable React components and custom hooks.
- Designed **RESTful API endpoints** and a **JSON-based flight database** supporting airline, price, stop, and route filtering, with backend validation and error handling.

QuickCash Mobile App | *Java, Android Studio, Firebase, Git, PayPal SDK* **December 2025**

- Collaborated in a **6-member team** to build an Android job marketplace app connecting employers and workers through job postings and search features.
- Developed and integrated core application features using **Java** and **Android Studio**, including employer dashboards, job posting workflows, authentication, UI navigation, and PayPal payment integration.
- Worked with **Firebase Authentication** and **Realtime Database** for user management, role-based access, and persistent application data.
- Used **GitLab branching, commits, merge requests and team collaboration workflows** to contribute features, review updates, and maintain code integration.

Technical Skills

Languages: Java, Python, C, C#, TypeScript, JavaScript, SQL, HTML, CSS
Frameworks/Libraries: ReactJS, Unity, Node.js, NumPy, Pandas, Streamlit, JUnit, Bootstrap, Playwright
Developer Tools: Git, GitHub, GitLab, GitLab CI/CD, VS Code, Eclipse, MySQL Workbench

Leadership / Extracurricular

Cyber Security Member (Volunteer) **September 2024 – Present**
Dalhousie University *Halifax, Canada*

- Volunteered at the HereWeCode Career Fair, guiding students and answering queries. Collaborated with recruiters, hiring managers, and attendees to ensure a smooth event experience.
