Education

Dalhousie University

Bachelor of Science (BSc) in Computer Science (Co-op)

September 2023 – August 2027

Halifax, Canada

Professional Experience

Software Developer Intern

January 2026 – May 2026

Nautel Halifax, Canada

- Built and enhanced automated testing infrastructure, reducing QA workload and increasing test coverage by **25%**.
- Developed and maintained **150+** end-to-end tests using **Playwright, Cucumber and TypeScript** enabling earlier detection of regressions in the development cycle.
- Designed and standardized **200+ unique Test IDs** across application pages with clear documentation to streamline test creation and minimize ambiguity between QA and developers.
- Refactored brittle **UI locators** with **AUI-based Test IDs**, significantly improving test stability and reducing flaky failures.

IT Support Intern

May 2024 – August 2024

Boruge Lahore, Pakistan

- Resolved **25%** of technical support issues within 24 hours by optimizing the ticketing workflow and enhancing the internal knowledge base.
- Increased user satisfaction by **22%** through regular training sessions and tailored one-on-one support.
- Improved operational efficiency by **31%** by automating routine troubleshooting tasks and deploying self-service IT tools.

Projects

PredictHealth (ML Diabetes Predictor) | Python, NumPy, Pandas, Streamlit, OpenAI

September 2025

- Built an **AI-powered** diabetes prediction app combining a Random Forest Classifier with a **Streamlit** interface.
- Achieved **72%** accuracy by applying preprocessing and standard scaling on a real-world dataset.

Flight Management System | SQL

March 2025

- Developed a relational database system to manage **flight scheduling, crew assignments, and airport operations**, improving efficiency in airline resource management.
- Designed a **normalized SQL database schema** and implemented **joins, subqueries, views and constraints** to efficiently retrieve and analyze operational data.
- Optimized database performance through **indexing and query tuning**, improving query efficiency by **15%**.

Unity Game (Global Game Jam) | C#, Unity, Photoshop

January 2024

- Won **1st place** (10+ teams) by building a glitch-free Unity game in a 5-member team.
- Designed and developed characters in Photoshop, integrating them into Unity with smooth animations.
- Applied 2D modeling, gameplay design, and **Unity workflows** to deliver a polished game.

QuickCash Mobile App | Java, Android Studio, Firebase, Git, PayPal SDK

December 2025

- Collaborated in a **6-member team** to build an Android job marketplace app connecting employers and workers through job postings and search features.
- Developed and integrated core application features using **Java** and **Android Studio**, including employer dashboards, job posting workflows, authentication, UI navigation, and PayPal payment integration.
- Worked with **Firebase Authentication** and **Realtime Database** for user management, role-based access, and persistent application data.
- Used **GitLab branching, commits, merge requests and team collaboration workflows** to contribute features, review updates, and maintain code integration.

Technical Skills

Certifications: AWS Certified Cloud Practitioner (CLF-C02), Cisco Introduction to Cybersecurity

Languages: Java, Python, C, C#, TypeScript, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: ReactJS, Unity, Node.js, NumPy, Pandas, Streamlit, JUnit, Bootstrap, Playwright

Developer Tools: Git, GitHub, GitLab, GitLab CI/CD, VS Code, Eclipse, MySQL Workbench

Leadership / Extracurricular

Cyber Security Member (Volunteer)

September 2024 – Present

Dalhousie University Halifax, Canada

- Volunteered at the HereWeCode Career Fair, guiding students and answering queries. Collaborated with recruiters, hiring managers, and attendees to ensure a smooth event experience.
